Foreword

Waverley has an above average number of children and young people among its citizenry who represent our future. It is important that these young people have the opportunity to thrive and develop into happy members of our community, able to feel valued and contribute to society as a whole.

Listening to what young people want and need to achieve their personal growth is the key to providing services and opportunities in conjunction with the Council's various partners. We will develop further our existing good working relationships with our partner service providers, both in the public and voluntary sectors, to ensure the very best provision of the right services for all our young people at the right time and in the right place, where they can be and feel safe, and deliver best value for money.

This first Youth Strategy sets out how we aim to achieve the provision of good services for our young people; it is a 'living document' which will change as the needs of young people change and are identified along the way. Engaging young people in decision making and local democracy will empower them to have their say about what matters to them now and will help shape their futures as happy and successful members of our community.

Every young person matters in Waverley and we are totally committed to the aims and objectives of the following strategy.

What is a Youth Strategy?

Young people are an important part of our local communities, they represent our future and their personal and social development is important for all of us. Whilst the borough of Waverley provides a range of diverse services and activities for young people, recent research¹ shows that providing information on services for young people, engaging with them in local democracy and decision making and giving them places to go and things to do, are among the top priorities for our young people themselves.

Waverley Borough Council's Youth Strategy provides a framework, which will guide the Council's delivery of services to young people from 10 - 18 years, (up to 25 with a special need) for the next five years. This strategy seeks to outline key issues and priorities for action, but it is not intended to duplicate or replace the work that organisations and community groups are already doing with and for young people

This strategy has been prepared with input, from our partner agencies and young people throughout the borough who have taken part in a range of consultation exercises². Waverley's Top Youth Council has also been involved in identifying issues, and has helped shape the strategy. Waverley Borough Council can offer a strategic role, drawing on the strength of partners to ensure that an integrated approach addressing the needs of young people living and going to school in Waverley and maximize available resources.

Why does Waverley need a Youth Strategy?

Waverley

Waverley Borough Council is situated in South-West Surrey. It is a rural district and the largest by geographic area in Surrey. Shaped by the Downs to the north and the Greensand Hills and Weald Clay to the south and it is an area of contrast and variety and of outstanding natural beauty.

¹ Youth Matters 2005 and Aiming High For Young People 2007

² Refer to page 7

Waverley has a population of 115,665 covering 133 square miles. 76% of land use is agriculture and woodland and 61% of the Borough is designated green belt. The area has three tiers of local government throughout with four main settlements - Farnham, Godalming, Haslemere and Cranleigh. The rest of the area has 17 rural parish councils comprising 20 villages

Youth Population

Waverley Borough has a population of almost 12,000 young people aged 11-18, representing 10.4% of the total borough population.

The percentage of population in the 0-24 age group in Waverley is lower than the national average, but above average in the 35-89 age group. Generally there are less people in the 0-24 age group with only 18% aged 0-14 and 11.1% aged 15-24.

The 2001 census identified that there were a total of 33,637 - 0-24 year olds living in Waverley. It is suggested that the population of Waverley is changing and projections indicate that by 2016 the number of children aged 0-19 in the Borough will fall by 0.9% and the number of older residents will increase.

The Council therefore has to balance the needs of young people against the needs of its other residents who may require different services but which are all competing for the same resources

This youth strategy acknowledges and addresses the key issues and priorities for young people in the borough, as identified by young people themselves. The strategy highlights the common concerns of the majority of young people, and aims to help inform and influence the work of statutory agencies and voluntary and community sectors that provide services and facilities for young people.

Aims of the Strategy

- To help ensure equality of opportunity for young people in the borough through access to facilities, resources, advice and information.
- To enable young people to have a voice and give them more opportunity to influence decision making in the borough.
- ❖ To ensure that young people are able to make a greater contribution to the development of their communities.
- To make the best use of resources in delivering services for young people by working more effectively with partners in the private, public and voluntary and community sectors.

Where does this strategy fit in?

This strategy identifies and focuses on what young people in the borough have told us about the important issues affecting their lives. It will complement and link with Surrey Children and Young People's Plan, Surrey Youth Development Service's borough plan and Surrey NHS – Achieving Health Improvement In Surrey, helping us to work more effectively with our partners on issues such as health, crime, education, careers, social care and vulnerable young people. This document will aim to inform and influence future plans and strategies that are relevant to and affect young people in the borough.

A number of statutory and voluntary organisations, often working in partnership, provide services for young people in the borough. The key partnerships and strategies currently directing, influencing and shaping youth services in the borough are:

National Context

Every Child Matters 2005

The government document Every Child Matters: Change for Children (December 2004) sets out the national framework for local change programmes to build services around the needs of children and young people so that opportunity is maximised and risk is minimised. It indicates the national and local priorities for children's services and sets out an outcomes framework, which includes five outcomes for children and young people, which are:

- 1. Being Healthy Enjoy good physical and mental health and living a healthy lifestyle
- 2. Staying Safe Being protected from harm and neglect
- 3. Enjoying and Achieving Getting the most out of life and developing the skills for adulthood
- 4. **Making a Positive Contribution** Being involved with the community and society and not engaging in anti-social or offending behaviour
- 5. **Economic well-being** Not being prevented by economic disadvantage from achieving their full potential in life.

Aiming High for Young People

A ten year strategy for positive activities, published in July 2007, sets out the Government's plans to help all young people, particularly those from disadvantaged backgrounds, to take part in enjoyable and purposeful activities in their free time.

Developed in response to new evidence that participation can help the development of social and emotional skills, and to address a clear demand from young people for greater access to activities, the strategy makes 55 commitments focusing on increasing young people's participation in positive leisure-time activities.

Designed to develop new skills and raise aspirations, the strategy will ensure that young people:

- Are empowered to have a say in the creation of services and in local funding decisions
- Can easily find out about local things to do and places to go, and are motivated to use the new and improved activities and facilities on offer
- Have access to services of an excellent quality, delivered by a diverse and professional workforce who are valued and supported to develop the skills to make a difference for young people.

Delivery of this strategy, as well as the wider programme of reforms to services and support for young people, will require the ongoing commitment of Local Authorities and of the full range of local partners, including the third and private sectors, parents and young people. At national level, the Department of Culture Schools and Families, providing a strong and more strategic leadership across Government to improve youth outcomes, will lead its implementation.

Regional Context

The Surrey Alliance for Children, Young People and Families

The Surrey Alliance for Children, Young People and Families, brings together services for children and young people in Surrey and has shared leadership and collective responsibility for improving outcomes for children, young people, and families. It is the Children & Young People (CYP) Thematic Partnership of the Surrey Strategic Partnership (SSP). It replaces the Children and Young People's Commissioning Partnership and meets the requirements of the Children Act 2004.

Purpose of the Alliance

Agencies with the Alliance (Waverley Borough Council being one) will come together, aligning priorities and resources to realise the following benefits:

- 1. Better outcomes for children, young people and families
- 2. Consistency in access and provision across the County
- 3. Maximum value for money

The Alliance will achieve this through specific outcomes to address the key priorities and themes, see below:

- Priority 1: Reduce health inequalities and make healthy choices easier
- Priority 2: Improve family safety, child protection and preventative services
- Priority 3: Improve education, training and employment outcomes especially for the lowest achievers
- Priority 4: Develop things to do and places to go targeting the vulnerable and disadvantaged
- Priority 5: Improving behaviour at home, at school and on the streets
- Theme A: Right services, at the right time, in the right place
- Theme B: Achieving better outcomes by working together

Surrey NHS – Achieving Health Improvement In Surrey Strategy

This Strategy focuses on improving health and reducing health inequalities. The Strategy has highlighted young people as a priority with one of the targets focussing on enabling the most deprived children and young people to grow up in safe surroundings with access to physical activity and affordable healthy food.

Local Context

Waverley Borough Council's Corporate plan

Our top five priorities in the Corporate Plan are:

- 1. Environment Protecting and enhancing Waverley's unique mix of rural and urban communities
- 2. Improving lives Improving the quality of life for all, particularly the more vulnerable within our society
- 3. Subsidised affordable housing Working for more affordable housing to be built, and managing Council housing well
- 4. Leisure Improving and supporting opportunities for all to take part in sport, recreation and culture
- 5. Value for money Ensuring all our activities are customer focused and provide good value for money

Consultation

Waverley Borough Council's Youth Service has put the strategy together, with input from young people, partner agencies and organisations working in the local area and other departments in the council who provide services to young people. It draws on feedback from consultation with young people across the borough through interviews, events and focus groups, partner and stakeholder meetings and Waverley's Youth Council.

- 1. Waverley's Top Youth Council the council's youth forum that provides young people aged 12 to 18 years who live or go to school in Waverley with the opportunity to engage with local democracy.
- 2. Partner and stakeholder consultation event held in January 2009
- 3. Focus groups with young people in Waverley secondary schools
- 4. Focus groups with young people in local youth groups
- 5. Voice Box Consultation at Waverley Youth Day 2008 and 2009
- 6. Councillor Question Time Events 2008 and 2009

What Waverley Young People say!

The consultation with Waverley's young people highlighted a range of issues, however, there were a few key areas that were highlighted repeatedly through the process.

Communication

How we communicate
Not enough information
Easy / accessible information
Lack of coordination between organisations

Transport

Cost of transport

Frequency, particularly at evenings and weekends

Cleanliness

Timetables not always clear and potential issues for young people with learning disabilities

Safety

More cycle paths

Unlit paths and streets – particularly when accessing public transport

Things to do and Places to go

Cost of activities

Access to the gym's at Waverley's Leisure Centres

Increase and improve Waverley's open access and fixed facilities, such as, skate parks and multi youth games areas Increase activities and provision in local areas

Decision Making

Increased promotion and awareness of Top Youth Council

Increased involvement in decision making within their local community

Increase involvement with Surrey Youth Parliament to influence Surrey County Council when making decisions for young people's services

Increase opportunity to highlight issues affecting young people with local members of parliament
