Subject: The future of Brightwells Gostrey Centre.

Dear Kelvin,

Following your visit to the centre on November 7th. the trustees of the centre would like you to go ahead with your proposal to ask the Executive of WBC to authorise a feasibility study to explore a design for a permanent move of the Centre to the Memorial Hall site in Farnham, to extend and build a premises suitable for our needs .

We understand that other facilities for the community could also be included.

As discussed, we would wish that the design and build would be with the full co-operation of the trustees.

We would expect that any new centre would be no smaller than that proposed in the East Street Development, and that the accomodation would be similar in design.

If agreed, we would hope that this plan would be executed at some speed, as the reason for not moving into the East Street position is to avoid the disruption that there would be to our centre during the building there.

With many thanks for all your hard work on our behalf,

With best wishes

Stephen Inman. (Chairman)
