GREEN STORE ASBESTOS STATEMENT
This statement is provided to inform you of the presence of asbestos in the building. Asbestos is a naturally occurring mineral fibre which is found in many types of building materials. Asbestos is a known carcinogen and can cause lung cancer and mesothelioma if inhaled. Asbestos is also a known irritant and can cause asthma and other respiratory conditions. The presence of asbestos in a building does not mean that it is dangerous. Asbestos is only a health hazard if it is disturbed and the fibres are inhaled. The presence of asbestos in a building does not mean that it is dangerous. Asbestos is only a health hazard if it is disturbed and the fibres are inhaled. The presence of asbestos in a building does not mean that it is dangerous. Asbestos is only a health hazard if it is disturbed and the fibres are inhaled.
